# GE Industrial Motors - Quantum V

## Key Features

- New and improved ball type non-reverse ratchet system allows reliable operation down to 150 rpm
- Rugged and reliable cast iron construction
- New improved thrust ratings offer the highest thrust ratings by power rating in the industry
- Patented bearing cooling system for TEFC motors eliminates the need for water cooled thrust bearings
- Improved oil reservoir and optimized bearing sizes eliminates the need for water cooled thrust bearings on most WPI/WPII ratings
- Class F insulation with Class B rise
- TEFC motors come standard with IP55 protection

## Optional Custom Features Available

- GEIM offers a fully-customizable product in a very short lead time. Optional features include but are not limited to:
- Complete range of base diameter and coupling BX diameter options
- Space heaters at a variety of voltages
- Insulated upper bearing system
- Insulated guide bearing
- Internally mounted shaft grounding ring
- 10, 100, or 120 ohm winding RTDs.
- 10, 100, or 120 ohm bearing RTDs.
- Normally Open or Normally Closed winding thermostats
- Winding thermistors
- Bearing thermocouples
- Oil temperature switches
- Standard and bronze stabilizer bushings for hollow shaft motors
- Custom voltages, service factors, and other electrical design options
- Special altitudes and ambients
- Stainless Steel hardware
- Extended leads
- Special paint chemistries and colors
- Custom Part Winding Starting and Y-Delta starting options
- Lower temperature rises
- Copper bar standoffs
- Terminal boards
- Cable glands
- Current transformers
- Surge capacitors and lightning arrestors
- Copper bar rotors
- Custom Polyseal®
- Formed windings (standard for Medium Voltage, optional for Low Voltage)
- Stainless steel shafts on solid shaft motors
- Vibration switches and transmitters

Quantum V - New upgrade of the existing vertical 500 frame WPI / WPII / TEFC motors
